Subject: Tetra Tech's Work Plan

Hi Jay and Zeb,

Please find Tetra Tech's work plan for the hazardous substance removal work at the former SoloPower facility attached. The tables of the work plan include Tt's estimate of hazardous substances remaining at the facility. The estimates in Table 1 were updated in September 2018 based on Tt's and FACS observations. Tt's health and safety plan is including as Appendix C. The file is 8.6 MB large so this should get through to you, Jay and Zeb, though please let me know if it doesn't.

Tetra Tech is in the process of compiling all of our documentation from the formal inspection and other site walks we have performed at the Site in the past 12 months. We will forward that to you once it is gathered.

As far as waste manifests, Tetra Tech did not request any during our typical inspection process. We will ask Clean Harbors if they can send us any historic waste manifests that they have, since they were previously involved with T&D for the facility.

We are still in the process of figuring out the remaining schedule and will let you know Jay when Clean Harbors will be handling the waste profiles and when they plan to return to start picking up totes and drums.

Please let me know if I missed anything from your requests and if you have any questions.

Thanks,
